

# ALEXANDRE DISDIER

## Front-End JavaScript Developer

*Detail-oriented, team player with experience developing softwares, applications and websites.*

### EXPERIENCE

#### Front-End Developer @ Stratumn

2019 - present // Paris, France

- Implemented product features using React and consumed complex api data using GraphQL clients (Relay and Apollo)
- Contributed, documented and maintained our UI components library
- Refactored and migrated our forms builder library to TypeScript
- Contributed to developing our internal UI tooling to configure our client's workflow processes, built with React/ TypeScript
- Unit test (Enzyme/ react-test-renderer) and end-to-end testing (Cypress)
- Close interaction with the Product team, discussing designs and best UX practices (Figma)
- Followed Agile Methodology with two-weeks sprints (JIRA)
- Candidate interview and Employee Onboarding
- Technologies used: JavaScript, TypeScript, React, GraphQL, Storybook, Jest, Enzyme, React-test-renderer, Cypress, Git, Semaphore, Codecov

#### Front-End Developer @ Pacific Ace

2020 // Remote from Paris, France

- Developed and tested a hybrid mobile app so Filipinos can check their bank accounts online (React Native)
- Collaborated with a back-end developer serving RESTful apis (postman)
- Collaborated with an UI/UX designer (Adobe XD)
- Developed the architecture, navigation, screens and components when keeping in mind scalability for more than 25,000 users
- Technologies used: TypeScript, Expo React Native, Formik & Yup, Firebase, Jest, @testing-library, Postman, Git, Semaphore, Codecov

#### Junior JavaScript Full-Stack Developer @ Kid'Iwi

2019 // Paris, France

- Developed the app architecture and navigation; contributed to the API development
- Created React Native components; built, implemented and refactored stacks
- Technologies used: MongoDB, Express, Expo React Native, NodeJS

#### Project Manager @ Kid'Iwi with The Family Startup Incubator

- Managed a 4 person team using scrum methodology
- In contact with the client and development team to establish MVP deliverables and project schedule; maintained technical documentation

#### Front-End Developer @ Freelance

2017-Present // Paris, France

- Developed websites on Wordpress with custom HTML, CSS, PHP, to serve business requirements
- Collaborated with UI/ UX designers and used SEO best practices; assured cross browser compatibility and mobile responsiveness
- Technologies used: HTML, CSS, Sass, Javascript, PHP, SQL
